CHECKLIST

Fuel and Water Storage Safety Checklist

- [ ] Choose holders designed for your container type with base support and a locking mechanism
- [ ] Bolt holders to the chassis or a securely mounted rack
- [ ] Position containers away from exhaust outlets and hot surfaces
- [ ] Shake each container by hand to confirm it cannot lift, slide or tip
- [ ] Check breather holes are clear before departure
- [ ] Mark water containers clearly and keep them separate from fuel cans
- [ ] Inspect containers daily for cracks, splits or seepage around caps
- [ ] Open fuel caps slightly at the end of each day to release pressure
- [ ] Filter fuel when pouring from can to tank in remote areas
- [ ] Replace any container showing UV damage, stress cracking or permanent deformation
